

Power Outage Management (POM)

The Carina™ POM enables utility companies to have near real-time and accurate power outage notification. The control and monitoring of the unit can be operated through CTI's Carina Xchange™ web-based user interface (requires no customer software) or can be integrated with existing software (SCADA, OMS, GIS, etc.).

Features

- ◆ Remote power outage notification
- ◆ Uses existing cellular network
- ◆ Operates through Carina Xchange™ web-based user interface
- ◆ Can be used with any residential meter
- ◆ Easily portable

Benefits

- ◆ Accurately monitors below any protection device
- ◆ Near real-time notification
- ◆ Multiple notifications to multiple agencies
- ◆ Completely scalable (can start with just one unit)
- ◆ No communication infrastructure required
- ◆ No customer software required
- ◆ Seamless integration with existing SCADA, OMS, GIS, etc.
- ◆ Unit easily installed between meter socket and meter
- ◆ No meter change-out necessary if relocated
